

The PRISM Suite

Operational Manual & User Guidelines

SYSTEM OVERVIEW

The **Prism Suite** is a streamlined administrative tool developed to enhance data accuracy and efficiency for school control teams. By utilizing automated logic, it simplifies the complex tasks of splitting and merging large-scale student records.

1. THE SMART SPLITTER MODULE

Use this module to divide a master dataset into categorized individual workbooks.

Step 1: Click the "**CLICK TO START SPLITTING**" button on the main dashboard.

Step 2: Browse and select the source master file you wish to process.

Step 3: Select your preferred **destination folder**. The suite will generate the split files in this location.

Step 4: Once processed, a confirmation message will verify the task completion.

2. THE SMART MERGER MODULE

Use this module to consolidate multiple workbooks into a single master report.

Step 1: Select "**CLICK TO START MERGING**" from the dashboard.

Step 2: Navigate to the folder containing all the files you intend to combine.

Step 3: Enter a **custom name** for the final output file when prompted.

Step 4: Choose the save location; the tool will finalize the consolidated report instantly.

IMPORTANT NOTES

Ensure that **Macros are enabled** to allow the automation to run. The suite is optimized for high-speed processing in the .xlsb format and supports custom naming conventions for all outputs to align with school filing standards.
