

The PRISM Suite

Automated Excellence in School Administration •
Refracting Data into Results

VBA-Project

Excel-Automation

Admin-Tools

v2.1

Project Description

The **PRISM Suite** is a premium automation framework designed for school control teams. It utilizes advanced **VBA (Visual Basic for Applications)** to eliminate manual data entry and processing errors during the examination and results phases of the academic year.

Core Functionalities

- **Smart Splitter:** Seamlessly divides master student records into separate, pre-formatted files based on user-defined parameters.
- **Smart Merger:** Aggregates decentralized data from multiple sources into a single unified report.
- **User-Centric Location Selection:** Allows users to specify destination paths and custom file names dynamically.
- **App-Style UI:** A clean, dashboard-driven experience that hides the spreadsheet grid for a professional software feel.

Tech Stack & Requirements

- **Engine:** Microsoft Excel VBA
- **Storage Format:** Binary Workbook (.xlsb)
- **UI Design:** Dashboard-driven, custom Hex coloring (#004B4D / #C5A059)
- **Requirement:** Macro-Enabled environment (Desktop Excel)
